-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 4 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Tsutsui Naoki (JP 2001-1102004).

Regarding claim 1, Naoki discloses an electric discharge light emitting lamp for producing an illumination beam, the lamp comprising a first electrode and a second electrode (line 10 of the abstract) facing each other and defining a discharge space there-between along the longitudinal axis of the lamp, wherein (abstract):

a first light emitting layer and a second light emitting layer are provided in the discharge space so as to face each other and to cover the first and second electrodes, respectively (abstract and the figure shown);

a dielectric material is inserted between the first electrode and the first light emitting layer, and between the second electrode and the second light emitting layer; and at least one of the first and second light emitting layers is arranged so as to define an uncovered region (lines 16-17 of the abstract), in which at least one of the dielectric material, the first electrode, and the second electrode is exposed to the discharge space (lines 16-17 of the abstract).

Art Unit: 2625

Regarding claim 2, Naoki discloses that the uncovered region extends from one end of the lamp continuously or discontinuously along the longitudinal axis of the lamp (abstract and the figure).

Regarding claim 4, Naoki discloses that a photoemission (luminescent) material is contained in the uncovered region (abstract lines 8-10).

Regarding claim 12, Naoki discloses that the uncovered regions are arranged in the first and second light emitting layers, and face each other across the discharge space (abstract and the figure).

Allowable Subject Matter

3. Claims 3 and 5-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
